Sales Across Segments

Profit Across Segments

Year Over Year Growth Across Segments

Key Insights

- Revenue growth exists, but **cost structure and aggressive discounting are reducing profitability**
- Consumer segment drives the **highest revenue (51.48%)**, while Corporate delivers **stronger profit margins (51.06%)**
- Business performance is **highly city-centric**, rather than evenly distributed geographically

Recommendations

- Prioritize expansion into **high-margin regions**, not just high-revenue markets
- Adopt a **region-specific product strategy** instead of a uniform global approach
- Focus on **Corporate customers for stable long-term growth**, while managing higher risk in the Consumer segment
